

Soprasolar from SOPREMA features *UNI-SOLAR*® thin-film laminate technology perfect for school and university applications:

- GLASS-FREE
- VANDAL & THEFT RESISTANT
- LOW-MAINTENANCE

Many school districts have already discovered the advantage of *UNI-SOLAR*®.

Combining *UNI-SOLAR*'s® patented technology with SOPREMA's 100 years of roofing expertise, Soprasolar becomes the logical choice for school and university Building Integrated Photovoltaic (BIPV) installations.

Soprasolar by SOPREMA offers:

- PROVEN IN-FIELD PERFORMANCE
- PRODUCES ENERGY EVEN IN LOW-LIGHT OR WHEN PARTIALLY SHADED
- BEST RESISTANCE TO WIND UPLIFT
- NO ROOF PENETRATIONS
- LIGHTWEIGHT; NO NEED FOR STRUCTURAL REINFORCEMENTS
- 20 YEAR ONE SOURCE WARRANTY COVERS PANELS AND ROOF

UNI-SOLAR® and SOPREMA are based in Michigan and Ohio, respectively. All solar cells and roofing membranes are produced in the United States.

~ Now is the time to install Soprasolar ~

Schools and Universities and the AMERICAN RECOVERY & REINVESTMENT ACT 2009

State Fiscal Stabilization Fund - Title XIV, Div. B

- \$53.6 billion has been appropriated and will be allocated by the Department of Education to the Governor of each state.
- 18.2% of these funds (\$8.8 billion) will be allocated with a wide range of distribution discretion, including:

Modernization, renovation and repair of public school facilities and institutions of higher learning consistent with a recognized green building rating system.

- All funds must be used within 2 years of being allocated.

Qualified School Construction Bonds

- \$11 billion per year for 2009 and 2010 national limitation on amount of bonds designated.
- To be used for the construction, rehabilitation or repair of a public school or for the acquisition of land on which such a facility is to be constructed.

Rooftop solar power offers a unique cost benefit to schools - a capitol expenditure on solar roofing will result in general fund savings through reduced electricity costs.
