

ANTIROCK

by SOPREMA

Made and Warranted in the U.S.A.

~ Waterproofing for Bridges ~

Advantages of using Antirock:

- ◆ Antirock ensures uninterrupted waterproofing of superstructure
- ◆ Antirock is resistant to fatigue in relation to the expected traffic load
- ◆ Surfacing may take place immediately after installation of Antirock
- ◆ Antirock prevents penetration of water into the substructure
- ◆ Antirock protects concrete and reinforcement from corrosive action of water, de-icing salts and other agents
- ◆ Antirock prevents entrapment of soluble substances in the structure
- ◆ Antirock eliminates the formation of stalactites or carbonate deposits
- ◆ Antirock constitutes one of the principal components of the superstructure's drainage system

Antirock is proudly manufactured and warranted
in the U.S.A. by SOPREMA, Inc.

For more information on why Antirock should be an
integral part of your state's use of 2009 American
Recovery and Reinvestment Act, please call:
