

ALSAN FLEX CLEANER

DESCRIPTION & APPLICATION

Alsan FLEX Cleaner is a biodegradable industrial/institutional heavy duty cleaner/degreaser used in preparing EPDM surfaces for Alsan FLEX SEBS applications. It is an exceptional degreaser which emulsifies complex soil on virtually any surface not harmed by water. Alsan FLEX Cleaner rinses thoroughly and leaves a pine scent. It is non-caustic and safe for the environment.

Application Conditions:

Alsan FLEX Cleaner can be applied using a standard garden pump sprayer. When cleaning mildly soiled surfaces, Alsan FLEX Cleaner can be diluted at a ratio of one part water to one part cleaner. More heavily soiled surfaces should utilize a fully concentrated product. A brush or broom can be utilized upon application of the cleaner to agitate the affected surface and facilitate cleaning. Once cleaning is completed, a low pressure water hose is used to rinse away any residual cleaner.

HANDLING AND STORAGE

Product is supplied in 5 gallon container with a pop-open pour spout.

Always store closed containers in cool, ventilated and dry location away from heat and oxidizing agents. Do not store in direct sunlight or in temperatures below 40°F (4°C) or above 100°F (37°C).

Shelf life: 12 months in original, unopened containers.

Refer to Material Safety Data Sheet (MSDS) for personal protection, proper handling and storage.

GENERAL

SOPREMA is a Certified ISO 9001:2000 worldwide producer of bituminous membranes and a manufacturer of liquid membrane systems with factories in Europe and North America. Waterproofing sheets have been produced by SOPREMA since 1908. SOPREMA has been at the forefront of liquid membrane technology for two decades.
