

ALSAN RS DECO CHIPS

DESCRIPTION & APPLICATION

DESCRIPTION:

Alsan RS Deco Chips are flat, angular pigmented polymer flakes suitable for broadcast.

PRODUCT USES:

Alsan RS Deco Chips are used as a textured and decorative broadcast medium for Alsan RS surfacing liquid-applied membrane applications and as a decorative component in aesthetic topcoats.

COLOR:

Alsan RS Deco Chips are available in white, black and grey.

PACKAGING:

Alsan RS Deco Chips are available in 1 kg (2.2 lb) resealable containers.

Alsan RS Deco Chips size: approximately 1/16" (1.6 mm).

STORAGE:

Always store in a clean and dry location. Product should not be dropped and seals should not be broken prior to use.

APPLICATION:

Alsan RS Deco Chips should be randomly hand broadcast in an upward motion into a wet application of specified Alsan RS resin without solidly covering of the wearing layer. Alsan RS Deco Chips can also be applied with mechanical applicator. After the color finish resin is cured, any loose Alsan RS Deco Chips may be removed by vacuum and/or oil-free compressed air. Refer to Soprema Alsan RS "resin" product data sheets and specifications for recommendations regarding coverage rate and application of the Alsan RS resins.

COVERAGE RATES:

Min. 0.019 kg/ft² (0.2 kg/m²).

See recommendations for specific applications. Yields will vary depending upon system selected and the smoothness of substrate.
