

soprafix[®] e

SBS Environmental Roofing System

A heavy duty, two-ply, self-adhering, modified SBS membrane system that eliminates the need for torching or hot mopping. This provides an ideal roofing solution that reduces labor risks and interruptions to tenants.

- Lower Total Cost
- Environmental Compliance
- Fast, Easy Installation
- Installs Over Most Existing Roofing
- Over Any UL Rated Insulation
- Over All Major Roofing Substrates
- Delivers Long Lasting Performance

Roofing & Waterproofing Contractors

Roofing contractors are switching to Soprafix-e for one simple reason: *They want to provide a better roofing solution to their customers while increasing profitability.*

Soprafix-e is easy to install and requires less clean up than fully adhering applications. The timesavings afford contractors opportunities to sell and install more jobs each year. This directly translates into cold, hard cash.

Because Soprafix-e eliminates the need for torches, this reduces contractor liability and guards against rising insurance premiums.

If you are a contractor who is looking for new ways to gain a defining edge over your competition, you need to learn more about Soprafix-e, as well as the full range of SOPREMA's roofing solutions.

Architects/Consultants

Progressive architects and consultants specify Soprafix-e.

Why?

Because they care about quality, they care about the environment and they care about the buildings they design.

Architects are now specifying Soprafix-e for:

- Office Buildings
- Government Buildings
- Schools
- Hospitals
- Laboratories
- Hotels

“Green” thinking is in and forward-thinking architects are leading the charge. Soprafix-e eliminates fumes and waste associated with other application processes.

Building Owners

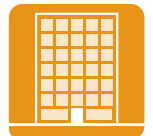

Educated building owners are demanding more performance and less headaches associated with repairs, re-roofing and new construction.

Soprafix-e is the logical choice for any owner who wants a new roof installed without interrupting the occupants of the building. Because Soprafix-e requires no torching or hot-mopping, there are no annoying fumes created during installation.

Benefits to building owners:

- Lower Total Cost
- Environmental Compliance
- Long-Lasting Performance
- Comprehensive Warranty
- No Interruption to Tenants

Additionally, SOPREMA can put you in direct contact with a trusted, time-tested, reliable roofing contractor in any area that you own buildings.

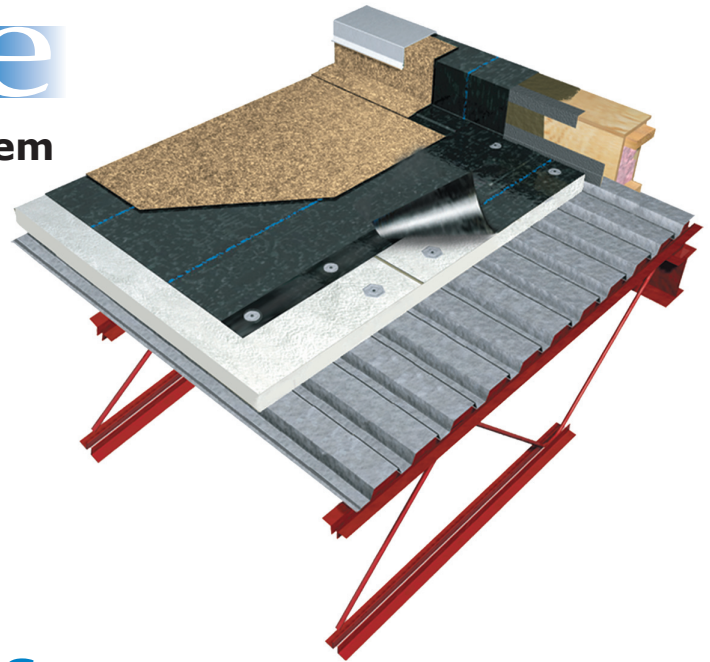

CORPORATE OFFICE

soprafix[®] e

SBS Environmental Roofing System

Soprafix-e is a heavy duty, two-ply modified SBS membrane system with base plies mechanically fastened to the deck and cap plies fully self-adhered to the base plies.

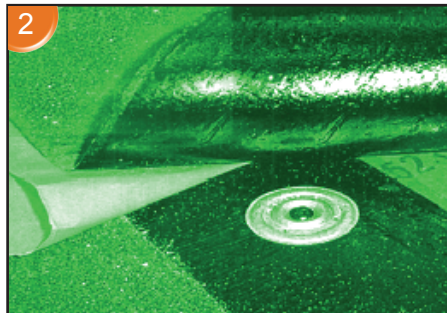

Soprafix-e is the roofing solution of choice in many areas across the country where growing regulations prohibit the potential hazards of torch applied, asphalt or adhesive fumes.

Installation Instructions

1 Install the base sheet dry and in parallel courses. Fasten the membrane in accordance with FM approvals.

2 Seal the joints with the self-adhesive side laps.

3 Install the cap sheet. The fast, clean, no-heat application of the self-adhesive membrane on top of the primer-coated base sheet.

4 Press down with a heavy roller to assure total surface self-adhesion.
